

Food in health security in South East Asia

Author(s):	Tuyen le D
Year:	2009
Journal:	Asia Pacific Journal of Clinical Nutrition. 18 (4): 493-497

Abstract:

With a global economic crisis, undernourished peoples in South East Asia, as elsewhere, face even greater food insecurity. Future challenges to food availability include increasing food prices, increasing population size and climate change. National policies are required which emphasise improved intersectoral coordination, enhanced government credibility and accountability, as well as a shift in food aid to investment in agriculture and the empowerment of independent institutions.

Resource Description

Communication: ☒

resource focus on research or methods on how to communicate or frame issues on climate change;
surveys of attitudes, knowledge, beliefs about climate change

A focus of content

Communication Audience: ☒

audience to whom the resource is directed

Policymaker

Exposure : ☒

weather or climate related pathway by which climate change affects health

Food/Water Security

Geographic Feature: ☒

resource focuses on specific type of geography

None or Unspecified

Geographic Location: ☒

resource focuses on specific location

Non-United States

Non-United States: Asia

Asian Region/Country: Other Asian Region

Other Asian Region: South East Asia

Health Impact: 

specification of health effect or disease related to climate change exposure

Malnutrition/Undernutrition

Mitigation/Adaptation: 

mitigation or adaptation strategy is a focus of resource

Adaptation

Population of Concern: A focus of content

Population of Concern: 

populations at particular risk or vulnerability to climate change impacts

Children, Low Socioeconomic Status

Resource Type: 

format or standard characteristic of resource

Review

Timescale: 

time period studied

Time Scale Unspecified

Vulnerability/Impact Assessment: 

resource focus on process of identifying, quantifying, and prioritizing vulnerabilities in a system

A focus of content
